AO-5

- ESA selected 4 Key Programs from 22 submissions, 1 US PI
- These 4 Key Programs consist of 2 Msec observations of the Galactic Center, the North Ecliptic Pole, and the Cygnus Region.
- In AO-5, scientists were able to propose for observations utilizing the 12.8 Msec of open time or for targets contained in the Key Program fields not of primary importance to the Key Programs.
- 160 Proposals were submitted:
 - 85 associated with Key Programs
 - 27 with US PI's
 - 5.9x oversubscribed (76 Msec requested)

AO-6

- The AO-6 Key Program AO has been released.
- Proposals are due November 30, 2007
- Announcement of the selections is due January 2008.
- AO-6 expected in March 2008 with proposals due in April 2008.
